

Generator Information for Participating in the California Energy Commission's Certificates of Specific Generation Program

Please fill out this form, then mail to:

Power Source Disclosure, MS-20
California Energy Commission
1416 Ninth Street
Sacramento, CA 95814

Name of Generating Facility: _____

Company Name: _____

Mailing Address: _____

ID Number of Generating Facility: _____

(If the facility has both an EIA number and an Energy Commission registration number, please provide both of them. If the facility has no number, or you do not know the number, leave blank; the Energy Commission can assign a number).

Does this facility already participate in a program administered by the California Energy Commission? If YES, which program? _____

Fuel or Technology Type (e.g., natural gas or solar): _____

Rated Capacity (MW): _____

Location of Facility (State or Province): _____

In or near (City): _____

Contact Person: _____

Telephone Number: _____

e-mail address: _____

Connected to transmission system of (utility company): _____

Scheduling agent: _____

How to Participate as a Generator in the California Energy Commission's Certificates of Specific Generation Program

1. Fill out the generator information form and send it to the Energy Commission by e-mail or regular mail. In about two to four weeks you will receive some disks containing Genreport 1.5 software and a set of serial numbers that have been allocated for your use.
2. Report kWh of generation and issuance of certificates quarterly to the Energy Commission using Genreport 1.5. The program contains instructions. Account for all kWh your facility generates on the certificates page of the program.
3. Do not create, or allow to be created, documentation other than a Commission certificate that an electricity retailer could use to support a claim that some or all of the electricity it sells to consumers originates from your plant or facility.
4. To establish an electricity purchaser's right to claim the electricity it sells as the output of your plant on a kWh for kWh basis, issue one or more certificates to each such purchaser. The sum of the kWh on the certificates should equal the kWh purchased.
5. Provide to the Energy Commission, on request, independent third-party documentation of your generation output in kWh. Meter data supplied by a scheduling coordinator or meter data management agent is an example of independent documentation.
